

## **Cosmopolitan Players Sustainability Statement**

Climate change presents a threat to our natural environment.

At Cosmopolitan Players, we are aware that through our activities, we have an impact on the environment and contribute to climate change. We believe that we have a responsibility to reduce any negative impacts wherever we can.

We are committed to developing and reviewing an environmental action plan which will be reviewed on an annual basis in order to try to address carbon reduction and engage the whole organisation.

As we push forward on our sustainability journey, we aim to embed good environmental practice across our operations, programming, and learning to deliver on our commitment to respond to the climate and ecological emergency. Stepping up to the challenge and implementing more environmentally sound practices.

### **Plan Of Action**

Reduce, reuse, repurpose, recycle

Reusing and recycling are at the heart of this commitment, with 50% of materials needing to have had a previous life, and 65% needing to be repurposed or recycled at the end.

Our current focus is to efficiently manage the consumption and disposal of resources across all operations to

- \* Eliminate, where possible, and reduce waste production
- \* Eliminate single use plastics
- \* Maximise reuse and recycling \* Achieve zero waste to landfill

For Reference, we will be looking at:

The Theatre Green Book, which has brought together theatre-makers and sustainability experts to create a common standard for making theatre sustainably.
